**A NEW SEMINAR ON  
AFRICAN FUTURES  
FREE TO ATTEND  
& OPEN TO ALL**

**Bukuku The Gateman**  
[www.patreon.com/diistories](http://www.patreon.com/diistories)

Technology is transforming environments and people all over the world. How do African writers imagine its impacts on the continent and beyond? Who are the artists and filmmakers who are shaping the conversation about science and technology from within Africa or its global diaspora?

University of Nairobi has teamed up with Imperial College to create a series of seminars and workshops exploring futures shaped by AI, automation, synthetic biology, surveillance capitalism, space exploration, nanotechnology and integration into the global industrial economy. Are you interested in learning more about African speculative cultures and how they can be leveraged to shape the future?

## **EMAIL TO ENROLL**

**John Irungu Mburu** [john.mburu@uonbi.ac.ke](mailto:john.mburu@uonbi.ac.ke)  
(University of Nairobi, Department of Agricultural Economics)
